

FRUITPORT COMMUNITY SCHOOLS

www.fruitportschools.net

Fruitport Community Schools is located near Hoffmaster State Park and the beautiful Lake Michigan shoreline. The Village of Fruitport neighbors Norton Shores, Spring Lake, and Grand Haven. It is about 30 minutes from both Grand Rapids and Holland. A qualified and dedicated staff and faculty serve over 2,600 students with progressive educational programs and services. Known for our outstanding academic and co-curricular programs, we provide an environment that celebrates individuality, promotes problem-solving through critical thinking, and encourages students to fulfill their potential as they become college/career ready. Resident students who graduate from Fruitport Community Schools and meet the eligibility criteria, will receive the Muskegon Area Promise two-year college scholarship.

FRUITPORT COMMUNITY SCHOOLS

Empowering Individuals to Positively Impact Their World

TECHNOLOGY

Fruitport Community Schools is dedicated to integrating technology into the curriculum. Currently, every student in third through twelfth grade has 1:1 access to a Chromebook. Grades three through eight have a dedicated Chromebook cart in their classroom and grades nine through twelve have a Chromebook they are allowed to take home with them. Along with traditional Internet filtering, we use a very robust program called Go Guardian to be sure websites are filtered properly, even when the student is using the device in their home. Each classroom is equipped with a multi-media cart including a document camera, a networked PC, a DVD player, a microphone, a touch panel control system, and HD projector. We also have a cart of 10 Chromebooks in each building's media center, along with at least one floating cart per building. Kindergarten through second grade classrooms have either seven Chromebooks or seven tablets.

Elementary There are five networked PCs in the media center, and one lab in each elementary building. In addition, Edgewood Elementary has a dedicated STEM lab.

Middle School Every core academic classroom has a 32-station Chromebook cart, special education rooms have a 10-station cart, and additionally, there are two available computer labs for student use. Students participate in a standards-based curriculum that serves as an introduction to computers and information technology and there is also a LEGO Robotics course available for interested students.

High School The high school is a 1:1 Chromebook building. In addition, there are 25 networked PCs in the media center and three labs available for student use. Class offerings include: business services and technology (BST), web-page design, drafting and architecture, and Virtual Enterprises International.
